Care Fragmentation Alerting

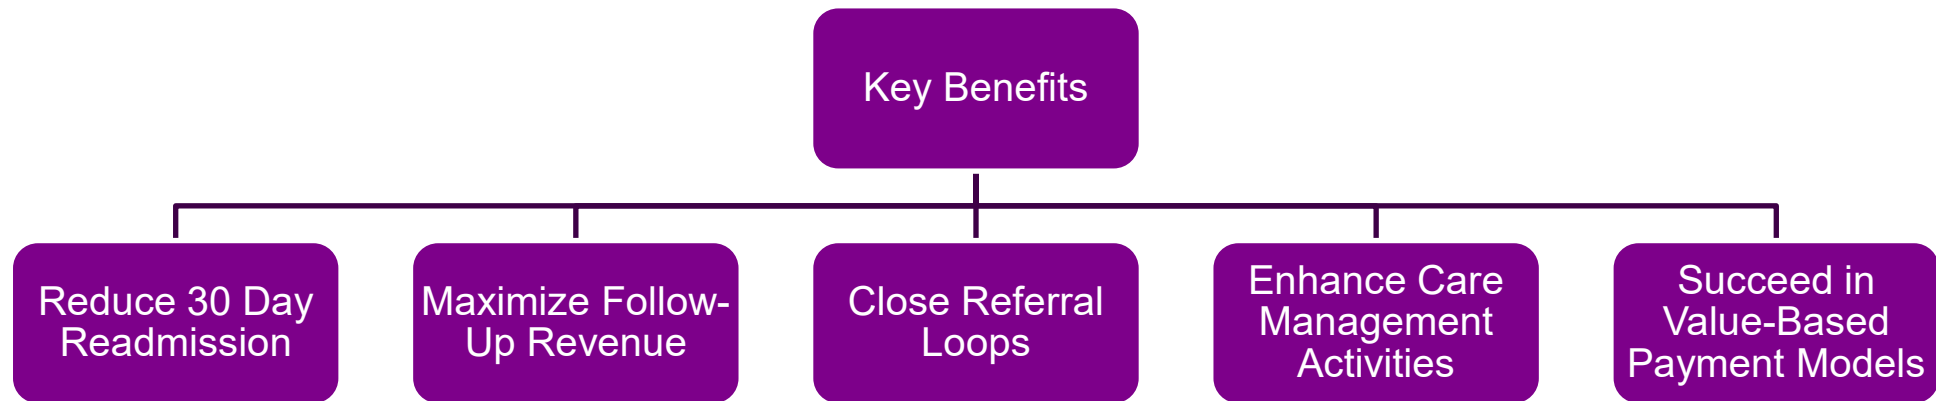

Real-Time alerts for fragmented patient care

Daily Reports for swift follow-up and coordination

Covers all care settings, inside & outside the organization

Care Gap Reporting

Generates real-time reports using up-to-date patient data based on specified value sets

Identifies care gaps (e.g., missed screenings, overdue vaccinations, uncontrolled chronic conditions)

Reveals actionable insights to facilitate targeted interventions and improve patient outcomes

Mobile NMDoH Screening Process

1. Register Patient

Connxus texts patient a link to complete the screening

2. Screen Patient

Patient completes the screening on their mobile device

3. Resource Recommendations

Connxus texts patient a list of community resources*

Living Situation

5. What is your living situation today?

- ☐ I have a steady place to live
- ☐ I have a place to live today, but I am worried about losing it in the future
- ☐ I do not have a steady place to live (I am temporarily staying with others, in a hotel, in a shelter, living outside on the street, on a beach, in a car, abandoned building, bus or train station, or in a park.
